PERSONAL PROJECTS

Car4Everyone Project

- Car4Everyone Project, The basic scenario of this project is we are making a website for a car business owner who want to list his car on his website and allow the user to come to the site and browse through all his latest cars and featured cars, search and filter the car by model or price and make some inquiries about his car
- Technologies Used : Frontend- Html, Css, Javascript. Backend- Django, PostGre SQL.

ACHIEVEMENTS

* Extensively utilized Django technologies,including forms,templates and orm for communication with databases in different forms while using interceptor,validators,actions using Django frameworks.

* Used the Python language to develop web based data retrival system.
