EDUCATION

Jaypee Institute of Information Technology, Noida

11/2022– 06/2026

Bachelor of Technology in Electronics and Communication Engineering

EXPERIENCE

Cybersecurity Intern at Threat Guardians | [Certificate](#) |

06/2025– 07/2025

- Contributing to a research-phase project on **Dark Web Monitoring and Threat Intelligence**.
- Learned how to develop scripts to analyze dark web forums/marketplaces, uncovering **illegal data exchange patterns**.
- Understanding application of **data parsing and automation techniques** on platforms like *Sleathmoth* to support threat detection pipelines.

PROJECTS

J-Prep — College PYQ Management System | [Link](#) | [GitHub](#) |

02/2025 – 05/2025

Technologies used: React, JavaScript, Tailwind CSS, MongoDB, Google Drive API, Express JS, Tesseract OCR.

- Built responsive **React frontend** for a MERN system capable of handling **10,000+ PYQs**, with fast, metadata-based search.
- Designed a **multi-step upload flow** with OCR feedback and progress tracking.
- Integrated **Firestore Auth with JWT** into React, enabling role-based access, multi-session login, and starred course tracking.
- Developed an **Admin Panel UI** for managing users, courses, and document validation.

*Responsibility: Frontend development using **React and Redux**, focusing on UI/UX*

Graphix — 3D Graph Visualizer | [GitHub](#) |

09/2024 – 11/2024

Technologies used: React, HTML, JavaScript, Tailwind CSS, 3D Force Graph

- Built an educational web app that **visualizes multiple graph algorithms** step-by-step using a typed multigraph structure.
- Offers two modes: Demo Mode with preset graphs and Playground Mode for user-defined custom graphs.
- Added a **live log console** and **playback controls** (pause, play, resume, reset) for step-by-step debugging and clarity.
- Optimized rendering and data flow to support 1,000+ nodes, ensuring smooth 60 FPS animations and responsiveness.

Football Prediction Model | [GitHub](#) |

05/2024 – 06/2024

Technologies used: Python (NumPy, Pandas, Scikit-Learn), Jupyter Notebook

- Built a **machine learning model** to predict football match outcomes using **5,000+ historical matches**.
- Implemented Logistic Regression and Random Forest, optimizing with feature selection.
- Achieved **~78% accuracy**, with precision (**0.81**), recall (**0.76**), and F1-score (**0.78**).

SKILLS

- Languages:** C/C++, Python, JAVA, SQL
- Web Development:** HTML, JavaScript, CSS, ReactJs
- Relevant Courses:** Data Structures, Algorithms, Operating Systems, Object Oriented Programming (OOPs), Computer Networks, Machine Learning

ACHIEVEMENTS AND CERTIFICATIONS

- Qualified for the college round of the Smart India Hackathon, '23
- First Runner Up in the INNOVATE 1.0, '23, IIIT-128
- Codeforces - Specialist – Max rating of 1486, global rank of 447 in Round 1020 Div 3 and rank 2124 in Round 1019 Div 2

POSITIONS OF RESPONSIBILITIES

• **Creative Head, IEEE Student Branch, IIIT**

06/2024– 06/2025

Led a 150-member volunteer team at Xenith tech fest, leading event branding, visual design, and promotional activities.

• **Team Member, Kalakriti Club, IIIT**

06/2023– 06/2024

Contributed to event ideation, visual design, and execution as part of the college's official creative society.

EXTRACURRICULARS

- Studied Fine arts at Intermediate level [[yourfavouriteshade](#)]
- Completed all Eight Levels of the Universal Concept of Mental Arithmetic System
