PROFESSIONAL SUMMARY

Results-driven Software Engineer with 4+ years of experience specializing in backend development using Microsoft .NET technologies, cloud platforms (AWS & Azure), and scalable database systems. Proven track record of delivering robust solutions across healthcare, fintech, and logistics domains. Adept at leading migration projects, designing RESTful APIs, and building cloud-integrated backend services.

WORK EXPERIENCE

Software Developer – Backend

Aug 2024 – Present

Channel Fusion | Remote / Mohali

- Developing backend services for a B2B SaaS platform using ASP.NET Core, C#, and a Microservices architecture — enabling multiple business clients to onboard and manage operations independently.
- Designing and building RESTful APIs consumed by frontend clients and third-party integrations, following clean architecture and SOLID principles.
- Architecting and implementing microservices with clear service boundaries, inter-service communication via HTTP/REST, and independent deployability for each domain module.
- Integrated Redis caching layer to reduce database load and improve API response times significantly for frequently accessed data.
- Setting up and maintaining CI/CD pipelines using GitHub Actions and Azure DevOps for automated build, test, and deployment workflows across environments.
- Implementing database optimization strategies — indexing, query tuning, and stored procedures — on SQL Server and PostgreSQL for high-throughput SaaS workloads.
- Integrating AWS cloud services (S3, RDS, Lambda) and Azure services to support scalable, cloud-native SaaS infrastructure.
- Collaborating with cross-functional teams in Agile sprints to deliver features, perform code reviews, and maintain high code quality standards.

Software Engineer

Feb 2021 – Aug 2024

One BCG (One Business Consulting Group) | Mohali, Punjab

- Developed and maintained full-stack enterprise applications using ASP.NET MVC, ASP.NET Core, and C#.
- Led a team for end-to-end migration of existing users from Recover Chargeback to a new platform, ensuring zero data loss and minimal downtime.
- Built RESTful APIs and microservices supporting multiple client-facing healthcare and financial products.
- Utilized AWS services (S3, Lambda, DynamoDB) and Azure cloud for storage, automation, and deployment pipelines.
- Worked across multiple domains including healthcare, payroll, US tax compliance, and chargeback management.

KEY PROJECTS

B2B SaaS Platform – Channel Fusion

Aug 2024 – Present

- Designed and built a multi-tenant B2B SaaS backend using ASP.NET Core with a Microservices architecture, enabling independent scaling and deployment of each business domain.
- Implemented Redis caching for session management and high-frequency data, significantly reducing average API response time and database load.
- Built and maintained CI/CD pipelines using GitHub Actions and Azure DevOps — automating build, test, and deployment across dev, staging, and production environments.
- Developed RESTful APIs with Swagger/OpenAPI documentation, enabling seamless third-party integrations and frontend consumption.

- Managed cloud infrastructure on AWS (S3, RDS, Lambda) and Azure for reliable, scalable SaaS operations.

State Serv – Healthcare Logistics Platform

Dec 2023 – Aug 2024

- Built backend services for a technician/driver management system handling delivery of healthcare equipment to hospice patients.
- Developed scheduling, routing, and real-time status tracking modules using ASP.NET Core and SQL Server.
- Integrated cloud-based notifications and audit logging for compliance requirements.

One Secure / Recover Chargeback / Op Care

Feb 2023 – Nov 2023

- Built chargeback recovery workflows enabling businesses to dispute and recover fraudulent credit card transactions.
- Developed appointment reminder system (Op Care) with automated call scheduling for patient engagement.
- Led team migration from legacy system to new architecture with data integrity validation.

US Tax Engine

Oct 2022 – Jan 2023

- Developed a tax calculation sub-system computing US federal and state taxes across multiple slabs and income types.
- Integrated AWS services to store and retrieve tax slab configurations dynamically.
- Designed the output pipeline to produce structured tax breakdowns consumed by the core payroll system.

Payroll Management System

Feb 2022 – Sep 2022

- Engineered employer records management module including seamless addition, updating, and deletion of associated tax records.
- Built complex payroll calculation logic for multi-state employees with varying tax brackets.
- Implemented data validation and audit trail features ensuring payroll compliance.

Direct Care Innovation – Healthcare Platform

Jul 2021 – Jan 2022

- Developed Email notification, Multi-language support, and Vendor management modules for a patient care application.
- Implemented localization (i18n) framework enabling seamless language switching across the application.
- Integrated third-party vendor APIs and built admin dashboards for care management workflows.

TECHNICAL SKILLS

Languages	C#, SQL, JavaScript (basic)
Frameworks	ASP.NET Core, ASP.NET MVC, .NET Framework, Entity Framework Core
Architecture	Microservices, REST API, Clean Architecture, Multi-Tenant SaaS, SOLID Principles
Cloud (AWS)	EC2, S3, Lambda, RDS, DynamoDB, API Gateway, CloudWatch
Cloud (Azure)	Azure App Service, Azure Functions, Azure Blob Storage, Azure SQL, Azure DevOps
Databases	SQL Server, PostgreSQL, MySQL — indexing, query optimization, stored procedures
Caching & Perf.	Redis (session & data caching), query tuning, connection pooling
CI/CD & DevOps	GitHub Actions, Azure DevOps, Git, Bitbucket, automated build & deploy pipelines
API & Docs	RESTful APIs, Swagger / OpenAPI, Postman, JSON
Dev Tools	Visual Studio, VS Code, SourceTree, Jira, Agile / Scrum

EDUCATION

Master of Computer Applications (MCA)

Jun 2019 – Jan 2021

Chandigarh University | CGPA: 6.9 / 10

Bachelor of Computer Applications (BCA)

Jun 2016 – May 2019

Commerce College, Jaipur

LANGUAGES

Hindi (Native) **English** (Full Professional Proficiency)
