SUMMARY

Full-Stack Developer, Frontend Engineer & DevOps Professional with 1+ years of experience in designing, developing, deploying, and maintaining scalable web applications. Experienced in building responsive user interfaces, managing production deployments, server infrastructure, domains, DNS, and Cloudflare services. Skilled in frontend development, testing, debugging, performance optimization, and rapid issue resolution based on client requirements. Strong background in ensuring website security, reliability, and high availability while delivering high-quality solutions in fast-paced environments.

PROFESSIONAL EXPERIENCE

ZeusInfinity Services 02/2025 – 05/2025
AI & Tech Intern

- Designed PostgreSQL schemas, CRUD, and migration scripts; re-architected data-access layer to support evolving requirements.
- Researched and integrated **AI/NLP models** (GPT-2, DistilBERT) to power HR query assistant with curated datasets.
- Built React-based data upload widget with Python REST API and automated DB-to-Excel sync to reduce manual effort.
- Published technical blogs on AI model selection, dataset curation, and deployment best practices.
- Delivered bug fixes, performance improvements, and new features under tight deadlines.

Full Stack Developer 11/2024 – 01/2025
Foos Food

- Contributed to B2B spice web platform, enhancing functionality, performance, and user experience.
- Built responsive, user-friendly interfaces with modern front-end tech and optimized back-end for scalability.
- Collaborated with team to deliver efficient, maintainable full-stack solutions.

Full Stack Developer 06/2025 – 06/2026
MCC

- Developed, designed, and maintained frontend applications.
- Managed production deployments, server infrastructure, domains, DNS, and Cloudflare configurations.
- Performed testing, debugging, and rapid issue resolution based on client requirements.
- Built responsive and optimized user interfaces while ensuring high performance and availability.
- Handled website hosting, security, and production environment management.

PROJECTS

PKSoft E-Commerce Platform 06/2025 – 06/2026
The platform simplifies the process of taking a traditional business online by providing an easy-to-use interface for store setup, product management, order processing, and customer engagement

- Quick and simple store setup with minimal configuration.
- Easy product catalog management, including categories, pricing, inventory, and product images.
- Mobile-friendly and responsive storefront for seamless customer shopping experiences.
- Secure order management and tracking system.
- Promotional features such as discounts, offers, and featured products.
- SEO-friendly architecture to improve online visibility.
- Cloud-based deployment with secure hosting and scalable infrastructure.
- Real-time analytics and reporting for business insights.

HR AI CHATBOT 02/2025 – 05/2025
AI-powered chatbot that helps HR teams and other non-technical employees retrieve data from databases without writing complex queries.

- "Developed AI-powered HR assistant with PostgreSQL, React, and Python REST API; integrated GPT-2/DistilBERT for NLP queries and automated DB-to-Excel sync.
- Designed PostgreSQL schemas, CRUD, and migrations; optimized database layer for evolving needs.
- Integrated **NLP models** (GPT-2, DistilBERT) with curated datasets to improve accuracy.
- Developed **React + Python REST API** for dataset ingestion and automated DB-to-Excel sync.
- Published technical blogs and delivered **bug fixes, performance optimizations, and new features** under tight deadlines.

SKILLS

- React.js
- Node.js
- RESTful APIs
- MongoDB
- SQL
- Python
- Cloudflare

EDUCATION

DAV Collage (Panjab University)
Bachelor of Computer Science
07/2021 – 07/2024 | Abohar
