

# AI Engineer (Python / LLM / API Integration) – Long-Term Opportunity

Posted yesterday

Worldwide

## Summary

We are looking for an AI Engineer to support ongoing development of real-world applications involving LLMs and automation systems.

This is not a research role — we focus on practical implementation and shipping working products.

## Responsibilities

- Build and integrate AI features using APIs (OpenAI, Claude, etc.)
- Develop backend services using Python (FastAPI or similar)
- Implement automation workflows and data pipelines
- Work with structured/unstructured data (JSON, text, embeddings)
- Collaborate asynchronously with our remote team

## Requirements

- 1–3 years experience with Python
- Hands-on experience with AI APIs (OpenAI, Claude, etc.)
- Basic understanding of LLM concepts (prompting, tokens, embeddings)
- Experience with REST APIs and backend development
- Good written English (communication is important)

Copy link

Nice to Have (NOT required)

- Experience with vector databases (Pinecone, Weaviate, Supabase)
- Familiarity with LangChain / RAG systems
- Basic frontend understanding (React or similar)

Engagement

- Start with a small paid test task
- Long-term collaboration for the right candidate
- Flexible working hours (async)

To Apply

Please answer:

1. What AI-related project have you actually built? (include link or explanation)
2. Which APIs/tools have you used? (OpenAI, Claude, etc.)
3. How would you build a simple chatbot with memory?

Start your proposal with the word "AX-AI" so we know you read this
