

Preetika Rana

Full-Stack Developer | .NET Core | SQL Server | Angular

Phone: +917814016549 | Email: preetikarana992002@gmail.com | GitHub: [Preetikarana](#) | LinkedIn: [Preetikarana](#)

PROFESSIONAL SUMMARY

Software Developer with 1+ year of experience in ASP.NET MVC, Angular, and WPF, specializing in UI enhancement, API integration, and asynchronous programming. Built and maintained a large-scale Angular utility platform with 50+ tools and contributed to UI improvements in MVC-based applications. Experienced in Task-based multithreading, REST API consumption, and building responsive, maintainable applications. Passionate about performance, clean architecture, and continuous learning.

TECH STACK

- DOTNET Core, Web API, MVC, Entity Framework
- SQL Server, LINQ
- Angular, TypeScript, JavaScript
- REST API development & optimization
- Query performance tuning (CTEs, Indexing, Pagination, Execution Plans)
- Git, Postman, Swagger, REST API Development

WORK EXPERIENCE

Creatick Solutions, Mohali

Software Developer (January 2025 – Present)

- Enhanced UI/UX for Agilus AI (ASP.NET MVC) through CSS and Razor view improvements
- Built All-In-Tool, an Angular multi-utility platform, developing 50+ tools with REST API integration
- Implemented multithreading and Task-based async operations in Principal_Bank (WPF) to improve performance
- Delivered client-driven features and bug fixes within tight timelines

Key Projects at Creatick Solutions

Agilus AI - ASP.NET MVC Application

- Improved UI/UX of customer service dashboards in an ASP.NET MVC application
- Enhanced CSS, layouts, and responsive design for better usability and visual consistency
- Updated Razor views to meet new design and branding requirements
- Coordinated with backend developers to ensure smooth integration with MVC controllers and models

AllInTool– Angular Web Application

- Developed a multi-utility Angular application with API-based backend integration
- Designed and implemented 50+ tools, including calculators, converters, encoders/decoders, productivity, and image tools
- Built reusable Angular components and services for scalability and maintainability

- Ensured responsive UI, efficient API communication, and proper error handling

Principal_Bank – WPF Desktop Application

- Worked on a WPF desktop application supporting banking-related operations
- Implemented multithreading and Task-based async programming to improve performance and UI responsiveness
- Handled client-assigned features and bug fixes within defined timelines
- Ensured smooth background processing through proper thread synchronization and error handling

CS Infotech, Chandigarh

Industrial Training (April 2024 – September-2024)

- Gained hands-on experience with .NET, Angular, Microservices, and SQL Server
- Developed an e-commerce platform for book shopping as a practice project
- Implemented JWT authentication and OOP principles for secure and maintainable code

EDUCATION

Post Graduate Government College for Girls, Sector-11, Chandigarh (Pursuing)

BCA – Bachelor of Computer Applications

Hartron

DCA –Diploma in Computer Applications

Government Model Senior Secondary School, Sector-23, Chandigarh

12th (Vocational– Information Technology) | 2019 – 2020 | 66%

Government Model Senior Secondary School, Sector-28, Chandigarh

10th | 2017 – 2018 | 62%
