

Mr. PREMESH BHATKAR

Sr. QA Engineer | 5.9+ year of Experience

 Email: premesh.bhatkar6671@gmail.com | Mobile: +91-8390522933 | Pune, India

PROFILE

Sr.QA Engineer with 5.9+ years of experience in manual testing, test automation using Selenium and TestNG, and API testing with Postman. Skilled in functional, regression, and integration testing, defect management using Jira, and SQL validation. Experienced in Agile environments, with strong problem-solving skills, attention to detail, and a commitment to delivering high-quality, stable software.

TECHNICAL SKILLS

- **Manual Testing:** STLC, Function Testing, Smoke Testing, Sanity Testing, Regression Testing, Re-Testing System Testing, Ad-hoc testing and Integration testing.
- **Java Stack:** Core Java, Advanced Java.
- **Automation Testing:** Hybrid Framework, Selenium Web Driver, TextNG, Apache Maven, Git, Github, Jenkins pipelines.
- **Database Testing:** MySQL , SQL queries, data validation.
- **API Testing:** Postman, JSON validation.
- **Project Management Tool:** Atlassian Jira, Agile/Scrum.
- **Domains:** HealthCare, Health Care insurance and E-commerce.

PROFESSIONAL SUMMARY

- 5.9+ years of experience in Manual Testing, Automation Testing, Web Testing and end-to-end Quality Assurance across QA, Staging, UAT, and Production environments.
- Strong knowledge of Selenium WebDriver, TestNG, Core Java, functional automation, regression automation, and UI automation for web applications.
- Hands-on experience in Functional Testing, Regression Testing, Integration Testing, Retesting, Smoke Testing, Sanity Testing, and Database Testing.
- Proficient in API Testing using Postman, validating status codes, request/response flows, and backend integration.
- In-depth knowledge of STLC, SDLC, Agile Scrum Methodology, Test Case Design Techniques, and Defect Life Cycle.
- Skilled in preparing and executing test plans, test scenarios, test cases, and documenting test results following QA best practices.
- Extensive experience using JIRA for defect logging, defect tracking, test execution, sprint planning, and Agile collaboration.
- Strong SQL expertise, including SELECT, JOINS, WHERE clauses, functions, operators, Insert/Update/Delete, and backend data validation.
- Hands-on experience collaborating with developers, product owners, business analysts, and technical architects to analyze requirements and clarify user stories.
- Proven ability in bug detection, root-cause analysis, defect reporting, defect triaging, and ensuring timely issue resolution.
- Strong analytical thinking, communication, attention to detail, and a commitment to delivering high-quality, reliable, and stable software releases.

EDUCATIONAL QUALIFICATION

- Bachelor of Engineering BE (Mechanical Engineering), Amravati University, Maharashtra (2012-2016).

EMPLOYMENTS

- Working as a “**Quality Engineer Senior Analyst**” at Accenture solution pvt ltd, Nagpur from 31 July 2024 to 10 Feb 2026.
- Working as a “**Quality Engineer – QA Functional**” at UST Product Engineering (Xpanxion international pvt ltd), Pune from 06 Feb 2023 to 08 Sep 2023.
- Working as a “**QA Engineer**” at Bharti Soft Tech pvt ltd, Vadodara from 16 June 2022 to 15 Sep 2022.
- Working as a “**Software Test Engineer**” at Multiapps Technologies pvt ltd, Bengaluru from 06 Dec 2018 to 24 May 2022.

PROJECTS DETAILS

1. Project: Kaiser Permanente

Domain: Health Care Insurance

Client: USA, NC and SC Health Insurance system

Description:

Kaiser Permanente is a U.S.-based integrated healthcare provider and insurer that offers health plans for individuals, small businesses, and large groups. To streamline its sales and enrollment process, KP uses digital self-service platforms such as Smart Quote and Low-Touch Application. Smart Quote is an online quoting system used by brokers, agents, and internal sales teams to generate health plan quotes quickly. The Low-Touch Application refers to KP’s digital enrollment process that minimizes manual intervention and paperwork.

Responsibilities:

- Writing effective and optimized Test Cases using Black Box Testing techniques
- Applied strong understanding of STLC, QA methodologies, and test design techniques to ensure end-to-end product quality.
- Designed and executed manual test cases for web applications, covering functional, regression, integration, and UI testing.
- Logged, tracked, and managed defects using Jira, and collaborated closely with developers to debug, retest, and verify fixes.
- Demonstrated strong analytical and problem-solving skills by identifying root causes, suggesting improvements, and preventing recurring issues.
- Participated actively in Agile ceremonies (daily stand-ups, sprint planning, retrospectives) and contributed to requirement analysis.

2. Project: Advantasure

Domain: Health Care Insurance

Client: USA Health System

Description:

Advantasure is a healthcare technology company that provides integrated solutions for health plans, providers, and healthcare organizations. Its platforms support claims processing, member enrollment, care and utilization management, provider networks, and compliance. These solutions streamline operations, improve data accuracy, ensure regulatory adherence, reduce costs, and enhance overall patient care outcomes.

Responsibilities:

- Designed and executed optimized test cases using black-box techniques, covering functional and regression testing.
- Analyzed requirements (SRS), prepared test scenarios, RTM, and test data, and coordinated with BAs for clarity.
- Identified, logged, and tracked defects in defect management tools, collaborating with developers for fixes and regression validation.
- Performed database testing using MySQL at application level and validated data integrity.
- Prepared test execution reports, participated in daily status meetings, and conducted peer test case reviews

3. Project: Healthgrades**Domain:** HealthCare Domain**Client:** USA Health System& Providers**Description:**

Healthgrades Technologies, Inc. provides an information management platform that helps people find the right healthcare by focusing on factors that impact health. It offers accurate, comprehensive details about doctors and hospitals, giving a full view of providers' qualifications. Its search and account tools let you filter doctors by your needs, book telehealth or in-person appointments online, and organize all your doctors in one place while tracking upcoming appointments.

Responsibilities:

- Analyze business requirements and test needs to define and implement automation strategy using Selenium WebDriver, Java, Maven, and TestNG.
- Design, develop, and execute new automated test scripts while maintaining existing regression suites.
- Prepare test scenarios, test cases, execute tests, and document results with detailed reports and summaries.
- Identify, track, and report defects or observations on a day-to-day basis to ensure quality delivery.
- Collaborate with project managers, developers, manual testers, and stakeholders while understanding application components and requirements.

4. Project: Zood Pay and Zood Mall**Domain:** E-commerce**Client:** Uzbekistan**Description:**

ZoodMall is an online shopping platform operating across Asia and Africa, offering products like electronics, fashion, beauty, and household items at competitive prices. It provides a smooth shopping experience with a user-friendly interface, secure payments, and reliable delivery. Zood Pay is its mobile payment app that enables secure transactions on ZoodMall and for services like bill payments, mobile top-ups, and money transfers. It supports multiple payment options such as cards, digital wallets, and bank transfers, ensuring fast, convenient, and secure payments.

Responsibilities:

- Develop, execute, and maintain test scripts and regression suites while preparing test cases, reports, and summaries.
- Report defects, share results with stakeholders, and ensure clear understanding of application components and requirements.
