

Rimple Chaudhary

FRONTEND DEVELOPER

Mohali, India +91 8894319767 rimplechaudhary1@gmail.com LinkedIn GitHub

PROFESSIONAL SUMMARY

Frontend Developer with 3 years of experience building scalable, enterprise-grade web applications using React.js, Next.js, and TypeScript. Delivered customer-facing portals for brands like EMAAR India and MaxLife Insurance, improving page performance by up to 40% and reducing redundant API calls by 30%. Expertise in component architecture, Redux/RTK state management, RESTful API integration, and responsive web design. Recognized as **Employee of the Year 2024** for exceptional ownership and cross-functional delivery.

TECHNICAL SKILLS

Languages

JavaScript (ES6+)

TypeScript

HTML5

CSS3

Frameworks

React.js

Next.js

Redux / RTK

React Query

Tailwind CSS

Ant Design

SSR / SSG

Testing

Jest

React Testing Library

Unit Testing

Build & Tools

Webpack

Vite

Git / GitHub

Node.js

npm / yarn

ESLint

Postman

GitHub Copilot

Cloud & DevOps

AWS S3

CI/CD

Design & UX

Figma

Responsive Web Design

Methodologies

Agile / Scrum

Code Reviews

JIRA

WORK EXPERIENCE

Frontend Developer | Technogetic Pvt. Ltd. Nov 2023 – Present

Projects: EMAAR India Customer Portal, MaxLife Insurance Platform

- Architected a reusable React component library of 20+ components, adopted across 5 enterprise applications, reducing development time by 30%.
- Built dynamic dashboards and customer-facing portals for EMAAR India and MaxLife Insurance using Redux and React Query, serving 10,000+ end users.
- Integrated RESTful APIs and implemented multi-step DigiLocker/Aadhaar identity verification workflows, processing 500+ verifications monthly.
- Reduced page load time by 40% through React.lazy code splitting, SWR caching, and skeleton loaders, achieving 90+ Lighthouse performance scores.

★ Employee of the Year — 2024

Frontend Developer Intern | Innnow8 Apps Apr 2023 – Oct 2023

Project: TaxZap — Progressive Web App

- Developed 15+ responsive UI components using React and Redux, following component-driven development practices and mobile-first design principles.

- Engineered real-time data modules with WebSocket integration, reducing dashboard data refresh latency by 50%.
- Integrated 3 third-party APIs (payment, analytics, notifications) into the frontend, collaborating with 2 backend engineers to ensure seamless data flow.

KEY PROJECTS

EMAAR India — Customer Web Portal *React, TypeScript, React Query, Node.js, AWS*

- Integrated DigiLocker API for Aadhaar-based identity verification with a multi-step authentication flow, securely managing API credentials using AWS Secrets Manager.
- Optimized API performance with React Query caching, reducing redundant network requests by 30% and improving perceived load times.
- Enhanced the NOC (No Objection Certificate) journey, improving completion rates by 25% through UX redesign and streamlined form validation.
- Implemented secure file upload and access using AWS S3 pre-signed URLs, handling 1,000+ document uploads monthly with time-limited access controls.

MaxLife Insurance Platform *React, Redux, Strapi CMS, Responsive Design*

- Developed policyholder dashboards with Redux-based state management, handling complex data flows across 12+ policy types and 4 user roles.
- Integrated Strapi CMS for dynamic, content-driven page rendering, enabling the marketing team to update 50+ pages without developer intervention.
- Established a reusable component architecture of 15+ shared components, improving UI consistency and reducing new feature development time by 20%.

TaxZap — Progressive Web App *React, TypeScript, Redux, Ant Design*

- Spearheaded development of a PWA to streamline the end-to-end tax filing process, achieving offline-capable functionality with service workers.
- Built scalable frontend architecture using React with TypeScript, reducing runtime type-related bugs by 60% and improving code maintainability.
- Implemented Redux for efficient state management across a 10-step filing workflow and integrated Ant Design for a consistent, accessible UI.
- Enhanced user engagement by 15% with Lottie animations, real-time form validation, and seamless API data exchange.
