

RAZAUL MUSTAFA

3D Artist | Product Visualization | Hard Surface Modeling

+91 732 205 0939 | officialsamar102@gmail.com | linkedin.com/in/razaulmustafa3d | East Champaran, Bihar, India

CAREER OBJECTIVE

Motivated and creative 3D Artist product visualization and hard surface modeling. Proficient in building detailed models in Autodesk Maya, crafting photorealistic materials in Substance Painter, and producing studio-quality renders using Arnold Renderer. Passionate about transforming product ideas into visually striking, cinematic renders that highlight design, materials, and lighting. Currently pursuing B.Sc. in Animation, VFX & Gaming at Chandigarh University. Open to Product Visualization Artist roles where I can contribute creativity and technical skill.

EDUCATION

B.Sc. Animation, VFX and Gaming — Chandigarh University Aug 2023 - Jun 2026
Specialization: Animation, Interactive Technology, Video Graphics and VFX

PROJECT EXPERIENCE

3D Artist (College Project & portfolio) Aug 2024 - Present

- Extract photorealistic product renders using Autodesk Maya and Arnold Renderer.
- Created high-quality PBR textures and materials in Substance Painter across electronics, accessories, and industrial product categories.
- Performed UV unwrapping using Rizom UV for clean, distortion-free texture mapping, composited final outputs in Adobe Photoshop.
- Managed complete 3D pipeline independently — concept modeling, texturing, lighting, rendering, and final presentation.
- Collaborated with other team member to interpret briefs and iterated on designs to meet and exceed project requirements.

KEY PROJECTS

College project Electronics Visualization

- Modeled and rendered high-end headphones and smartwatches with photorealistic studio lighting in Autodesk Maya + Arnold Renderer.

Hard Surface Modeling Portfolio

- Built a series of mechanical and industrial product models demonstrating clean topology, accurate proportions, and production-ready geometry.

PBR Material Library & Cinematic Lighting Studies

- Created comprehensive PBR material library (metal, plastic, rubber, glass) in Substance Painter; produced dynamic mood-driven renders using HDRI and area light rigs.

TECHNICAL SKILLS

3D & Rendering: Autodesk Maya, Autodesk 3ds Max, Arnold Renderer (HDRI, Area Lights)

Texturing & UV: Substance Painter (PBR), Rizom UV, UV Unwrapping, Distortion-Free Mapping

Post-Processing: Adobe Photoshop (Compositing, Color Grading, Presentation)

Core Competencies: Hard Surface Modeling, Product Visualization, Photorealistic Rendering, PBR Texturing, 3D Pipeline Management, Team Collaboration

SOFT SKILLS

Detail-Oriented | Fast Learner | Creative Problem Solver | Team Collaborator | Deadline-Driven
