EDUCATION

Poornima University

Bachelor of Technology in Computer Science & Engineering

Jaipur, India

Sept. 2021 – June 2025

EXPERIENCE

Software Engineer

Finnaux Techsolutions Pvt. Ltd.

April 2025 – Present

Jaipur, India

- Built and optimized LOS dashboard modules supporting high-volume loan workflows across multiple branches.
- Developed Python-based support backend and integrated financial APIs to streamline operations.
- Improved UI performance, stability, and state management using React, Next.js, Tailwind CSS, TanStack Query, and TanStack Table.
- Contributed to scalable frontend architecture in production-grade fintech systems.

Web Developer

99iSolutions

Nov. 2024 – April 2025

Jaipur, India

- Developed and optimized full-stack web applications with a strong focus on React-based frontend architecture.
- Improved API response time by 25% through efficient data handling and frontend-backend coordination.
- Implemented responsive UI components and improved usability across production deployments.

Full Stack Developer Intern

Full Stack Learning.

May 2024 – July 2024

Jaipur, India

- Built responsive web applications and interactive frontend modules using modern JavaScript frameworks.
- Applied authentication, CRUD operations, and RESTful services for real-world backend systems.
- Collaborated with mentors to follow best practices in coding, debugging, and version control.

PROJECTS

SyncNest-Chat (Real-Time Messaging App)

- Built a real-time chat application using React on the client and Node.js + Socket.io on the server, enabling instant bi-directional messaging between connected users.
- Implemented room-based conversations, message broadcasting, and clean UI components for chat history and active conversations, focusing on responsive layout and UX.
- Structured the app as a separate client/server codebase with clear APIs, making it easy to deploy and scale the frontend and backend independently.

StackPilot (Production-Ready SaaS Backend)

- Designed and executed a modular NestJS backend with JWT + Google/GitHub OAuth, MongoDB (Mongoose), and strict DTO validation for secure multi-tenant SaaS workflows.
- Integrated Stripe billing and Nodemailer-based transactional emails to handle subscription lifecycle (plans, webhooks, onboarding mail) in a fully configurable way using environment-driven settings.

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript

Databases: MySQL, PostgreSQL, MongoDB

Backend: Node.js, NestJS, Django, Flask, Strapi

Authentication & APIs: REST APIs, JWT, Better Auth, OAuth

Frontend: React, Next.js, Tailwind CSS, HTML/CSS

State & Data Management: TanStack Query (React Query), Context API, TanStack Table

DevOps & Tools: Git, GitHub, Docker, Postman, Vercel, Nodemailer

Core Concepts: Workflow Automation, State Management, Performance Optimization
