Experience

Actualisation Group

Software Engineer

July 2024 – Present

Chandigarh, India

- Contributed to multiple live projects focusing on API development and integration using ASP.NET Core and Entity Framework.
- Developed backend solutions and enhanced user interfaces using jQuery to optimize user experience.
- Collaborated with cross-functional teams including AI specialists to deliver high-quality software solutions.

CS Infotech

Full-Stack Developer

January 2024 – July 2024

Himachal Pradesh, India

- Developed and maintained full-stack web applications using modern frontend and backend technologies.
- Designed and implemented RESTful APIs and integrated them with responsive user interfaces.
- Worked with SQL Server to design, manage, and optimize database operations.
- Collaborated on real-world projects, ensuring efficient functionality and user-friendly design.

Projects

JVC Anytime Fitness – AI Lead Engagement | ASP.NET Core, Bland AI, Twilio, SQL Server etc.

2024 - 2025

- Built an automated **AI calling service** using **Bland AI** to trigger outbound calls to website leads, enabling real-time follow-up and improving lead conversion without manual intervention.
- Developed a **smart scheduling engine** to determine optimal call times based on business hours and follow-up frequency, reducing lead response time significantly.
- Implemented an **after-hours SMS automation pipeline** using **Twilio Flow** ensuring no lead goes unattended outside business hours.
- Integrated an **AI chatbot agent** in the SMS flow to intelligently converse with customers, understand membership queries, and respond contextually across multiple club locations.

Firefly – AI Email Management System | ASP.NET Core, C#, JavaScript, jQuery, SQL Server etc.

2024

- Integrated Gmail API to fetch incoming emails and store them in the database for centralized management.
- Designed an interactive dashboard to view, track, and manage all emails in a Gmail-style interface.
- Implemented AI-based automated email reply generation to reduce manual effort and improve response time.
- Enabled Gmail labeling for efficient email categorization, tracking, and workflow management.
- Handled PDF attachments by downloading and securely storing them using Azure services.
- Built workflow features for assigning, managing, and responding to customer emails within the system.

- Actualisation Dashboard – Internal Management System | *ASP.NET Core, Entity Framework, SQL Server etc.* 2024
- Developed modules for employee data management, Jira task tracking, and Slack integration for real-time team notifications.

• Built break management, shift monitoring, and automated performance reports including Employee of the Month selection logic.

Technical Skills

Languages: C# , Python

Web Development: HTML5, CSS3, JavaScript, Bootstrap, jQuery, ASP.NET Core

Database & ORM: SQL Server, Entity Framework

Developer Tools: Visual Studio, Git, Slack, Jira, Postman

API Development: RESTful API design and integration

Certifications

Anubhav Fellowship Program2025

IIT Mandi iHub & HCI Foundation

Achievements

Third Position – Mathematical Olympiad (Block Level)2019

Himachal Pradesh
