Summary

Senior Project Lead and Project Manager with 15+ years of leadership experience across software development, enterprise systems, and Indian government projects. Over the last 3 years focused on Project Management, with a strong foundation in .NET C# full-stack development, cloud platforms, and modern application architectures. Proven expertise in project planning, costing, documentation, government payment handling, execution, and delivery optimization. Experienced in managing cross-functional teams, client relationships, and complex systems, including CMS portals, AI-driven applications, healthcare platforms, and enterprise solutions. Adept at aligning technical excellence with business goals and delivering high-impact outcomes.

Professional Experience

Project Lead | Drish Infotech Ltd.

January 19, 2023 – Present | Mohali, Punjab

Leading a large-scale Indian Government Tourism Web Portal with a customized CMS and multiple business and trading categories.

- Managing end-to-end project lifecycle, including planning, execution, delivery, and optimization.
- Coordinating development using PHP, Laravel, ReactJS, and MySQL, ensuring performance, scalability, and security.
- Driving cloud deployment, system optimization, and integration of payment gateways and e-signature services.

Managing backend development and AI integration for an AI-powered Garden Assistant application of US based client.

- Responsible for AI prompt engineering, workflow design, and integration of OpenAI-based features, including Speech-to-Text (STT) and Text-to-Speech (TTS).
- Leading and mentoring cross-functional teams while ensuring timely delivery and quality standards.
- Tech Stack: Python, Flutter, OpenAI APIs, PHP, Laravel, ReactJS, MySQL, Cloud Platforms

Team Lead | Netsmartz Square

September 1, 2021 – January 18, 2023 | Mohali, Punjab

- Led the development team on various projects, ensuring that all technical and functional requirements were met.
- Managed daily operations, providing team members with clear goals and feedback, fostering collaboration and motivation.
- Successfully executed development strategies in ASP.NET Core, MVC, and Angular, integrating microservices and cloud solutions (AWS and Azure).

Project Lead | Drish Infotech Ltd.

December 1, 2015 – August 31, 2021 | Mohali, Punjab

- Promoted from Technical Lead to Project Lead in January 2019, managing critical projects in various industries.
- Led teams for system design, development, and deployment of applications using .NET technologies, including C#, MVC, Web APIs, and SQL databases.
- Oversaw system architecture, integration with third-party services, and cloud deployment, optimizing performance and security.

Manager IT | Green Field Enterprises (Kirloskar GOEM)

July 1, 2010 – November 30, 2015 | Chandigarh, Punjab

- Managed the IT department, supervising the development of enterprise-level solutions and ensuring the smooth operation of systems.
- Worked on implementing and maintaining ERP systems, utilizing technologies such as ASP.NET, SQL Server, and JavaScript.

Team Lead | Drish Infotech Ltd.

November 1, 2006 – June 30, 2010 | Mohali, Punjab

- Led telecom VAS projects, managing the development of applications and integrations with telecom services.
- Guided the development of secure, scalable systems, integrating APIs and databases for seamless communication across platforms.

Skills

- **Languages:** C#, HTML, CSS, JavaScript, jQuery, .NET
- **Technologies:** .NET Core 5.0, MVC, Web APIs, AWS, Azure, Bootstrap, Shell Scripting, JIRA, Git
- **Databases:** MS SQL Server, MongoDB, Oracle, MySQL, Cosmos DB
- **Tools:** Visual Studio (2017/2019), VS Code, AWS, Google Cloud, Microsoft Azure, JIRA, Git
- **Additional Knowledge:** Python, SignalR, WebRTC, Socket.IO, Automation with Python and Shell Scripts, Selenium, Payment Gateway Integration (Paytab, Stripe, Clover), Twilio SMS, Auth0 Authentication
- **Cloud Services:** AWS (Storage Blobs, Redis Cache, Azure Functions)
- **Project Management:** Agile, Scrum, JIRA, Ace Project

Key Projects

AI-Powered Garden Assistant (US-Based Client)

Technologies: Python, Flutter, OpenAI APIs, Firebase- API, remote config and DB

- Managing backend development and AI integration for an intelligent, AI-powered garden assistant application.
- Responsible for AI prompt engineering, conversational workflow design, and optimization of AI responses.
- Integrated OpenAI-based features, including Speech-to-Text (STT) and Text-to-Speech (TTS) for voice-enabled user interactions.
- Ensuring scalable, secure backend architecture and seamless integration with mobile and web frontends.
- Leading and mentoring cross-functional teams, ensuring timely delivery, code quality, and adherence to project milestones.

Uttarakhand Tourism Web Portal

Technology Used: PHP, Laravel, ReactJS, MySQL

- Led the development of a dynamic CMS for a tourism website.
- Integrated multi-language support, secure cloud deployment, and third-party integrations like payment gateways and e-signatures.

eSanjeevani (National Telemedicine Service of India)

Technology Used: .NET Core, MVC, C#, MySQL, Cosmos DB, Angular

- Managed the development of a telemedicine platform for remote healthcare access, utilizing cloud services and APIs for seamless integration.

Driving School Scheduler

Technology Used: MVC, C#, SQL Server, JavaScript, Paytab, Clover, Twilio

- Managed the development of a scheduling system for driving schools with payment gateway integration and real-time notifications.

Auth0 - Passwordless Authentication with Email

Technology Used: .NET Core 5.0, C#, SQL Server, Auth0 SDK

- Developed an API for implementing passwordless authentication using Auth0 services.

Media Proxy Application

Technology Used: .NET Framework 4.8, JavaScript, MongoDB, Selenium

- Led research and development efforts for automating the conversion of captions into STL format and sharing them via FTP.

Live Streaming of Microphone Audio via WebRTC

Technology Used: .NET Framework 4.8, FFmpeg, RecordRTC

- Developed a solution for live audio streaming from a microphone to a remote server using WebRTC.

Qualification

- M.Sc. IT, PGDIT & PGDTT from SMU
- Graduation from Punjab University
- 10+2 and 10th from KV, sector 31, Chandigarh (CBSE)

Personal Information

- **Home Address** - #3128, Sector 71, Mohali, Punjab - 160071
- **Date of Birth** – 4th Dec 1973
- **Marital Status** – Married and two Children's
