Summary

Dynamic and results-oriented software developer with expertise in .NET, Angular. Proven track record of delivering high-quality solutions in fast-paced environments. Experienced in full-stack development, API integration, and project management. Strong problem-solving skills and a passion for learning new technologies. Effective communicator with a collaborative mindset, dedicated to driving project success and exceeding client expectations. Programming Language:

Experience

- CS Infotech** 20/09/2022 - 31/03/2023
Full Stack Development Training
Received comprehensive training in .NET, Angular, ReactJS and SQL Server. Developed a project using .NET Core MVC and Angular, gaining hands-on experience in web application development.
- Autviz Solutions** Apr/2023 - Sep/2024
Software Engineer
Played a key role in several projects focusing on .NET Core & Angular.
Created APIs and integrated them into frontend applications, enhancing user experience and functionality.
Collaborated closely with team members to deliver high-quality solutions meeting client requirements and deadlines.

Education

- Indus International University** 2015-2018
Bachelor of Computer Applications
CGPA 6.06
- Indus International University** 2018-2020
Master of Computer Applications
CGPA 6.00
- HPTSB** 2022
Computer Operator & Programming Assistant
84%

Skills

- Programming Language: C, C++, JavaScript, C#, SQL
- Framework: .NET MVC, .NET Core, Angular
- Web Technologies: HTML, CSS
- Version Control: Git
- Tools: Visual Studio, SQL Server Management Studio, MongoDB, Git
- Database: SQL Server

Projects

- Sales Management System**
Developed a Sales Management application integrating Node.js for web scraping and .NET Core with Angular for data management and user interface.

- Implemented web scraping to retrieve latest job listings from Upwork and stored them in SQL database. Managed records of applied/rejected jobs and tracked project time spent by users.
- Technologies used: Node.js, .NET Core, Angular, SQL Server.
- Job Application Platform**
ApplyGenie.ai
Technologies: Integrating Python for web scrapping and ABP Framework, .NET (Backend), Angular (Frontend)
Description: Built a job application platform with the ABP framework, integrating LinkedIn and web scraping to simplify the application process. Utilized ABP’s modularity for a clean, maintainable architecture, with .NET handling backend operations securely and Angular ensuring a responsive UI. This approach streamlined development while offering users a seamless, efficient job search experience.
 - E-commerce Application**
Buyable
Technologies: ABP Framework, .NET, Angular
Description: Developed a shopping application using the ABP framework to streamline CRUD operations and ensure modular, scalable architecture. Leveraged .NET for a reliable backend and Angular for an intuitive frontend, delivering an optimized user experience. The ABP framework enabled rapid development of reusable modules, enhancing system performance and maintainability.
 - Developed Gantt Chart Functionality**
Pico Web Project
Technologies: VB.NET, Gantt Chart
Developed and implemented Gantt chart functionality to streamline project scheduling and task tracking.
Enhanced task management by integrating features for updating task dates, dependencies, and resource allocation directly within the Gantt interface.
Utilized VB.NET to build a responsive and user-friendly interface, optimizing user experience for project managers and team members.
Achieved efficient data handling by synchronizing Gantt chart updates with backend processes, ensuring accurate, real-time project data.

Additional Information

Certificate in C++ from SMD Web Solutions

Interests

- Cricket

Language

- English, Hindi, Punjabi

Achievements & Awards

- Awarded a "Certificate of Appreciation" for contributions to project success and team collaboration.
