PROFESSIONAL SUMMARY

Software Developer with 2.6+ years of hands-on experience in developing, enhancing, and supporting web applications using ASP.NET MVC, ASP.NET CORE, SQL Server, Angular. Experienced in working on real-time projects, understanding business requirements, and implementing role-based modules. Strong in CRUD operations, stored procedures, and MVC architecture, with practical exposure to frontend technologies such as HTML, CSS, jQuery, and AJAX. Comfortable working across the full development lifecycle including development, testing, bug fixing, and deployment support.

TECHNICAL SKILLS

- **Backend:** C#, ASP.NET MVC, ASP.NET Core, ASP.NET, ADO.NET, Web API, Entity Framework
- **Frontend:** HTML, CSS, JavaScript, jQuery, AJAX, Angular, Bootstrap
- **Database:** SQL Server
- **Tools:** Visual Studio, VS Code, Swagger, Postman, GitHub
- **Concepts:** MVC Architecture, OOP, SDLC, Authentication and Authorization

PROFESSIONAL EXPERIENCE

Techsum Technology Pvt. Ltd.
Software Developer

July 2023 - Present

Roles & Responsibilities

- Understood business requirements shared by Team Lead and implemented them into application features as per project needs
- Developed and maintained web applications using ASP.NET MVC and ASP.NET Core by following coding standards and project guidelines
- Created controllers, models, and views in ASP.NET MVC and worked with basic ASP.NET Core APIs for data handling
- Implemented role-based authentication and authorization to manage secure access for different user roles
- Designed and optimized SQL queries and stored procedures using SQL Server to ensure better performance and data accuracy
- Integrated frontend with backend using JavaScript, jQuery, and AJAX to improve user interaction and reduce page reloads
- Communicated regularly with team members and Team Lead to understand tasks, clarify doubts, and share progress updates
- Fixed bugs and performed enhancements based on client feedback and issues reported by the QA team
- Took ownership of assigned tasks and ensured timely completion while supporting deployment and release activities
- Handled assigned modules independently under guidance and ensured smooth delivery of features

PROJECTS

T.S Chain To Pay – P2P Management System (ASP.NET MVC, C#, SQL Server, HTML, CSS, Bootstrap, JavaScript, jQuery, AJAX)

Role: Team Member

- Developed ERP Procure-to-Pay (P2P) module features including Purchase Requisition (PR), Request for Quotation (RFQ), Purchase Order (PO), Goods Receipt Note (GRN), Quality Check, Inventory Management, invoice processing, and payment tracking. Implemented MVC architecture and database logic to improve maintainability and performance.
- Designed and implemented database tables, stored procedures, and complex SQL queries.
- Integrated business validation rules for approval workflows and transaction tracking.

Tech Society Connect (ASP.NET MVC, C#, SQL Server, HTML, CSS, Bootstrap, JavaScript, jQuery, AJAX)

Role: Team Member

- Converted desktop housing management system into a web-based application.
- Worked on **Secretary module**, handling maintenance bill generation, member record management, payment tracking, financial reports, notice management, and communication with residents. Developed income and expense management to maintain accurate society financial records
- Worked on **Security module**, managing visitor entry/exit logs, gate pass approvals, resident verification, and access control monitoring.
- Used SQL Server stored procedures for secure data storage and retrieval
- Designed responsive user interfaces using Bootstrap for better usability

Tech Society Connect (Web Form, ADO.NET, C#, SQL Server)

Role: Team Member

- Developed a standalone desktop application using .NET and ADO.NET to manage housing society operations including maintenance billing, member management, visitor tracking, financial reporting, and database management.
- Implemented secure CRUD operations and optimized SQL queries for better performance. Developed backend business logic using C# and ADO.NET to handle core application functionalities. Designed and executed SQL Server queries and stored procedures for secure and efficient data storage and retrieval

T.S Stay Manager (Web Form, ADO.NET, C#, SQL Server)

Role: Team Member

- Developed a desktop application for homestay bookings, guest details, and billing.
- Implemented SQL Server database to manage rooms, customers, and payments efficiently.
- Reduced manual errors and improved booking accuracy.

EDUCATION

Bachelor of Computer Application (BCA)

2021
